Qualifications

Broomfield School (2012 – 2017)

GCSE's:

Maths (8) English Language (6) Additional Science (B) Core Science (B) Media (A)
Double-award Media (B) English Literature (5) Business (B) Turkish (B) French (C) History (C)

Winchmore Sixth form (2017 – 2019)

A-Levels:

Mathematics (A), Further Mathematics (B), Economics (C)

Queen Mary University of London (2019 – 2022)

Mathematics with Finance & Accounting – First Class Honours

I studied a variety of modules across my degree and completed a dissertation on 'Cryptocurrencies: Their influence on the economy, the maths surrounding them and their future in society.' This dissertation discusses the importance and relevance of Cryptocurrencies today and the mathematics behind it. Outside of Maths, I completed a module on the French Language in which I received 80%+, I did this as I plan to continue learning the language once I finish university. I also completed a history module to build my essay writing skills, this helped prepare me for my post graduate year. My module in Statistical Modelling in which I achieved 75%+ allowed me to develop my technology skills, particularly on a software called RStudio.

King's College London (2022-2023)

Post Graduate Certificate in Education for Mathematics with Qualified Teacher Status

During my postgraduate year in Education, I spent a lot of my time (approximately 85%) teaching in schools. I also had to complete two master's level essays which required much primary research. For my second essay, I chose to discuss the importance of technology in education and mathematics, I used a wide range of mathematical and dynamic software and encouraged pupils to use applications such as 'Open AI' to develop their knowledge in preparation for presenting it to myself and their peers for review.

Employment History

Trainee Investment Analyst at Quill Capital Partners - (November 2023 to Present)

- Comprehend the investment management process and the dynamics of financial markets.
